OUR MILL

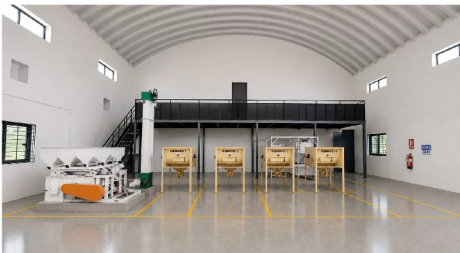

CLEANED HUSK

Five product lines, one crop

RM Psyllium LLP processes *Plantago ovata* — isabgol — at its own mill in Siddhpur, Gujarat. Seed is cleaned, sieved, air-separated, milled and packed to the grade, mesh and specification a buyer requires. Every shipment carries a Certificate of Analysis for the lot.

01		Psyllium Husk Husk cleaned, sieved and separated, supplied in six standard purity grades.	GRADES 85 · 90 · 95 · 97 · 98 · 99% USE Supplements · pharma · food
02		Psyllium Husk Powder Husk milled to the mesh a buyer's process requires, for capsule fills, tablets, drink mixes and bakery systems.	MESH 40 to 120, to specification MILLED FROM Any husk grade
03		Organic Psyllium Husk & Powder Husk and husk powder from certified organic crop, handled on segregated lots with traceability to the grower.	CERTIFIED NPOP · NOP · EU organic AS Husk and powder, same grades and mesh
04		Psyllium Seeds Whole <i>Plantago ovata</i> seed for buyers who process in house or require the intact seed.	FORM Whole seed USE Processing · re-milling
05		Industrial Psyllium Powder Powder at lower purity, for non-food applications. Wetted, it swells into a gel that binds soil, seed and mulch, then dries to a crust that remains permeable to water.	FORM Milled powder USE Hydroseeding · dust suppression · erosion control

Grade recommendations are made against the intended application and volume. Please state both when enquiring, and a sample can be prepared with the corresponding lot COA.

PROCESSING PLANT

Grades and mesh

The grade figure refers to husk purity: the proportion of light seed coat against seed and heavier matter. Purity, moisture and swelling volume are confirmed on each lot's Certificate of Analysis, and grades are aligned to the USP, Ph. Eur. and BP monographs.

85%

95%

98%

99%

HUSK AT FOUR PURITIES

GRADE	CHARACTER	TYPICALLY SPECIFIED FOR
85%	Mid purity	Food and general supplement blends
90%	Mid to standard purity	Food blends and bulk fibre products
95%	Standard commercial grade	Supplements and everyday fibre products
97%	High purity	Supplement and nutraceutical blends
98%	High purity, low seed content	Nutraceutical and supplement grade
99%	Highest purity	Pharmaceutical and clinical use

Mesh

Powder is milled from any husk grade, so its purity follows the grade selected. Mesh is set to the buyer's process. Finer mesh disperses faster in drink mixes and capsule fills; coarser mesh retains more of the husk texture in baking. Custom mesh and specifications are supported.

MESH	CHARACTER	TYPICALLY SPECIFIED FOR
40	Coarse	Baking, where husk texture is retained
60	Medium coarse	General food and blending applications
80	Medium	Supplement powders and fibre blends
100	Fine	Drink mixes and capsule fills
120	Finest	Fast dispersion and pharmaceutical use
